

DRIVEN TO PERFECTION

For more than 35 years, Fanaco has dedicated itself to providing the most comprehensive line of fastening products offered in the industry. We meet and exceed our customer's needs with a knowledgeable and responsive sales team, same day shipping, and a sincere interest in fostering long-term relationships. Our mission is to provide the best service in the industry whether you are a family owned retailer or nationwide company. We strive to create partnerships, growing together toward a common goal. Our loyal and satisfied customers are the best way to spread our message. The Fanaco team is the core of our culture of excellence, making each day exciting, challenging, and a joy.

I want to thank you for your continued business.

Jacob Davis
President and CEO

TERMINOLOGY	26–29
CREDIT APPLICATION	30–32

21° PLASTIC COLLATED NAILS

USES: Framing, decking, wall sheathing, fencing, siding

HEAD: Flat head, large head

SHANKS: Smooth, Ring, Screw

FINISHES:

Vinyl Coated, Electro Galvanized, Hot Dipped Galvanized, Stainless Steel, Stainless Steel 316

TYPE: Hitachi

- Fanaco FANNR83A
- Hitachi NR83A, NR90AC
- Senco 600FRH, 650 FRH, 700XL, 750XL
- Bostitch RHN90, RHN95
- Duo-Fast CN137, CN350
- Porter-Cable FR350

34° PAPER COLLATED CLIPPED HEAD NAILS

PRODUCT CODE

FANCL2113

USES: Framing, decking, wall sheathing,

fencing, siding

HEAD: Clipped head SHANKS: Smooth, Ring

FINISHES: Vinyl Coated, Electro Galvanized,

Hot Dipped Galvanized

TYPE: Paslode

ENGINEERED TO FIT:

Hitachi NR83AA3, NR83AA4, NR90AD(S)

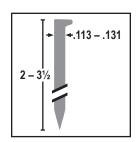

Vinvl Coated

- Senco 600D, SN70, 700XL, 750XL
- Paslode F-3505 IMCT

USES: Asphalt and fiberglass shingles, roofing, felt, foam and fiberboard sheathing, insulation

HEAD: Large flat head **SHANKS:** Smooth, Ring **FINISHES:**

Electro Galvanized, Hot Dipped Galvanized, Stainless Steel, Stainless Steel 316

GAUGE: 11

- Hitachi NV45AB, NV45AB2
- Senco SCN200R, RP450/455XP
- Boxtitch N12B-1, RN46
- Duo-Fast DRN45
- Porter-Cable RN175

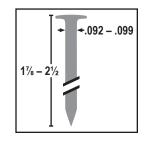

15° PLASTIC SHEET COLLATED COIL SIDING / FENCING NAILS

USES: Siding, pallet and crating, light duty framing, fencing, cedar shake

HEAD: Flat head **SHANKS:** Smooth, Ring

FINISHES: Electro Galvanized, Hot Dipped Galvanized

ENGINEERED TO FIT: Duo-Fast DC300/75, RNC-60

P-TYPE WIDE CROWN 16 GAUGE STAPLES

USES: Cedar, shake shingles, sub-floor, wall sheathing, roof decking, aluminum and steel composition, siding, lathing, bridging, component assembly, fencing

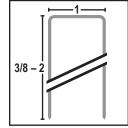

FINISH: Electro Galvanized, Stainless Steel

GAUGE: 16

TYPE: Senco

ENGINEERED TO FIT:

- Hitachi N3824A
- Senco PW
- Duo-Fast KWR 1748A, RS1748A

TERMINOLOGY

Nail Anatomy

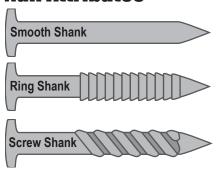

HEAD — Round flat metal piece formed at the top of the nail; for increased holding power

LENGTH — Distance from the bottom of the head to the point of a nail.

POINT — Sharpened end opposite the head for ease in driving.

SHANK — The length of the nail between the head and the point; may be smooth, or may have rings or screws for greater holding power

Nail Attributes

SMOOTH SHANK — Most common nail shank; relies on friction between the wood and the shank for holding power; effective in many, but not all, conditions.

RING SHANK — Small directional rings on the shank to prevent the nail from working back out once driven in; commonly used for flooring, sheathing, drywall and decking.

SCREW SHANK — Spiral thread on the shank causes screw shank nails to turn into wood; increases holding and withdrawal capacity in hard woods; screw shank nails can splinter soft wood.

DIAMOND POINT — Most common nail point; comprised of 4 sides and ends in a point

BLUNT DIAMOND POINT — Dulled tip to reduce wood splitting; more difficult to work with; comprised of 4 sides and ends in a point

CHISEL POINT — Reduces wood splitting; comprised of 2 sides; mostly used for pallet-making and manufacturing.

Nail Type

BOX — A wire nail with a head; box nails have a smaller shank than common nails of the same size; often used for light general interior and exterior construction, carpentry, framing and box making.

CASING — A wire nail with a slightly larger head than finish nails; often used for flooring and when concealment is desired.

COMMON — A common construction wire nail with a disk-shaped head that is typically 3 to 4 times the diameter of the shank; common nails have larger shanks than box nails of the same size; for general interior and exterior construction, carpentry and wood framing.

DUPLEX — A common nail with a second head, allowing for easy extraction; often used for temporary work, such as concrete forms or wood scaffolding; sometimes called a "scaffold nail."

FINISH — A wire nail that has a head only slightly larger than the shank; can be easily concealed by countersinking the nail slightly below the finished surface with a nail-set and filling the resulting void with a filler such as putty, spackle or caulk; often used for light fastening of interior trim work, finish carpentry and cabinetry.

NEOPRENE WASHER — A nail with a neoprene washer to seal against moisture; often used for exposed applications such as flashing.

SINKER — The most common nails used in framing today; same thin diameter as a box nail; cement coated; the bottom of the head is tapered like a wedge or funnel and the top of the head is grid embossed to keep the hammer strike from sliding off; often used for construction, carpentry and framing.

Staple Anatomy

CROWN — Spans the width of the staple.

LEG — Spans the height of the staple.

Finishes

ELECTRO-GALVANIZED — Electro-Galvanized metals are designed to withstand weather conditions where non-coated metals would fail due to moisture exposure. Electro-Galvanization is a process in which ions of electricity excite the particles of zinc and attract them to the metal in a dense and complete coating, giving it the resistance needed to withstand average weathering at coating specs: 20-25MU (MU metric gauge for chromation) which comply with ASTM A 641-92, class 1 coating weight. This coating weight has been tested to withstand 24 hours of salt spray testing. Limited resistance to rust.

HARDENED — Includes heat treated and/or high carbon steel.

HOT DIPPED GALVANIZED — Used to ensure greater resistance to corrosion and rust over a much longer period than any other form of coating. Galvanized nails should be used where moisture may cause deterioration of the fastener. In addition, galvanized nails are recommended for pressure-treated wood because copper is part of the treatment; due to galvanic action, the copper would corrode metal nails without the zinc coating.

During galvanizing, molten zinc reacts with the surface of the base material to form a series of zinc/iron alloys that provide an inner layer of protection against corrosion. Hot Dipped galvanizing is a process in which metal is immersed into molten zinc to form a protective layer which completely covers the steel surface and seals it metallurgically to protect from the corrosive actions of its environment.

Fanaco Fasteners Hot Dipped Galvanized nails meet or exceed ASTM A-153 Class D.

VINYL COATING — Vinyl coatings serve two purposes: first, the vinyl makes the nail easier to drive by reducing friction. Second, the friction generates enough heat to melt the vinyl when driven. After cooling, the vinyl is adhered to the nail and the wood which makes it harder to remove. The vinyl coating is usually green or yellow.

BRIGHT — Uncoated steel finish for use where corrosion resistance is not required. No surface coating; not recommended for weather exposure or acidic or treated lumber.

STAINLESS STEEL — Provide the highest corrosion resistance. Composed of stainless steel for extreme environmental conditions. Fanaco Fasteners nails are available in stainless steel types 304 and 316.

Fanaco Fasteners Stainless Steel nails meet or exceed ASTM A-153 Class D.

Abbreviations

VC = VINYL COATED

GALV = GALVANIZED

EG = ELECTRO GALVANIZED

REG = RING SHANK ELECTRO GALVANIZED

HDG/HDC = HOT DIPPED GALVANIZED

RHDG/RHDC = RING HOT DIPPED GALVANIZED

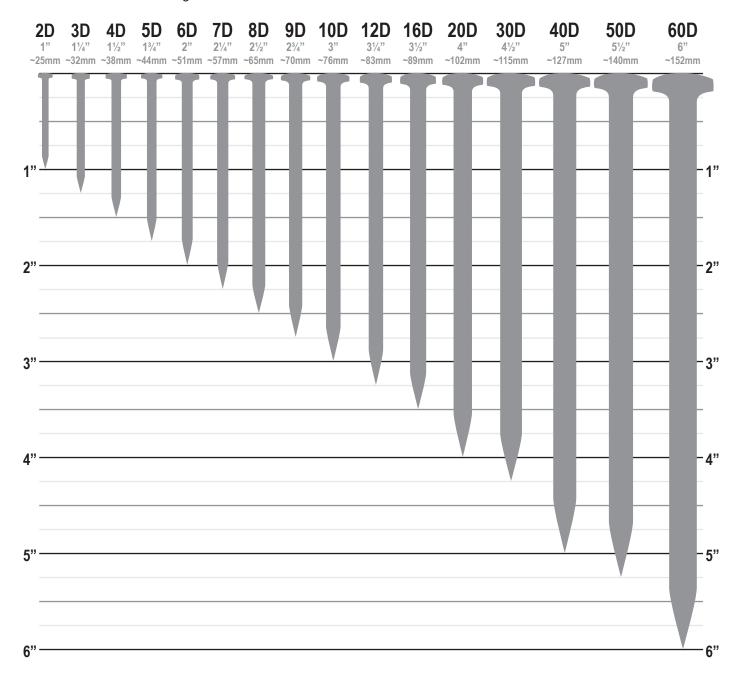

SS = STAINLESS STEEL

RSS = RING STAINLESS STEEL

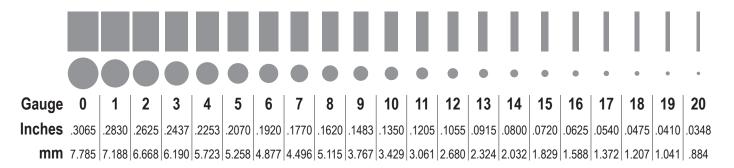

NAIL SIZES

The Pennyweight system, which is still used today, was developed in medieval times and is likely based on how much nails cost. The longer the nails, the more pennies they were worth. The letter D is used to indicate "penny" because the system was developed around the Roman coin, the denarius, which means "penny" in English. The theory is that 2 denarius would have bought 100 2D nails.

		USINESS CRENIT TERMS			

Please be advised that all information will be held in strictest confidence. Upon Credit approval, a limit may be established at the sole discretion of Fanaco Fasteners LLC (Creditor). Applicant authorizes Creditor to conduct a credit investigation and contact any/all references as provided.

Applicant's signature attests financial responsibility, ability, and willingness to pay Creditor invoices in accordance with the terms stated on each invoice. No terms or conditions on a Purchase Order differing from the terms of Creditor shall be accepted unless agreed on by Creditor in writing. Payments may be applied against open charges at the discretion of the Creditor. In the event that an account becomes delinquent, the applicant waives the right to a jury trial and the prevailing party is entitled to attorney fees, expenses, and costs for any action, suit, claim, arbitration, or appeal. Venue and jurisdiction of any legal action shall lie in King County, Washington.

Applicant agrees to notify Creditor of any changes in ownership or legal status of the business. Absent such notice, these terms (including the guarantee below) shall apply to any such business that is the result of a change in ownership or legal status. Until Creditor receives written notice by certifies mail or any change in ownership or entity, applicant (and the guarantor) agrees to accept liability for all charges to the business conducted under the firm name or any name substantially similar thereto.

Should credit availability be granted by Creditor, all decisions with respect to the extension, continuation, or termination of credit shall be at the sole discretion of Creditor. Applicant also agrees to the following:

- 1. The terms of each sale shall be payment in 30 days.
- 2. Credit is extended for business purposes only
- 3. A finance charge of 1.5% per month on past due balances will be paid to Fanaco Fasteners LLC by the undersigned.
- 4. The undersigned grants a security interest in tools, equipment, and construction supplies that are purchased, and agrees that title to such property shall remain in the name of Fanaco Fasteners LLC as a security interest until the purchase price of same has been paid in full. The undersigned grants to Fanaco Fasteners LLC the right to enter the debtor's business premises and pick up, without notice, any merchandise sold and delivered in the event the account becomes delinquent.
- 5. In the event the undersigned shall breach any of the terms and conditions of this agreement, including being late with payment, Fanaco Fasteners LLC shall be entitled to a late fee of \$150.00 for each month and/or partial month the account is delinquent.
- 6. The undersigned will pay and perform the obligations hereunder, upon demand, without requiring any proceeding to be taken against the above named organization.
- 7. In the event of litigation and referral of Fanaco Fasteners LLC claim to an attorney for collection, then the undersigned agrees to pay reasonable attorney's fees, expenses, and court costs.
- 8. All products are sold as-is and without warranty. The undersigned understands that Fanaco Fasteners LLC disclaims all warranties of merchantability or fitness for a particular purpose. Fanaco Fasteners LLC agrees to pass on - to the extent available - any manufacturers warranties to the buyer without recourse.
- 9. The undersigned waives any right to a claim of lost profits, consequential damages, or incidental damages regarding products purchased. The sole remedy for Seller's breach of the agreement is replacement of product sold to the undersigned.
